

RENEWABLE SOLAR ENERGY FOR SMALL BUSINESSES ACROSS AFRICA

Waringa Matindi
CEO

January 2020

ACROSS AFRICA, ONLY 7% RURAL BUSINESSES HAVE GRID ACCESS

Rural Off grid SMEs in Uganda emit over 100m tonnes of CO2 annually

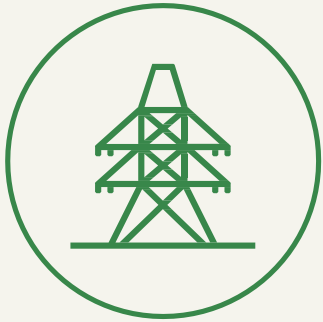

400,000+

Off grid SMEs including
Schools, Health Centres

Assuming 10% of the off-grid business use generators and consume 3L of diesel per day, their CO2 emissions are more than 100M kg per annum.

**Off grid businesses rely on diesel generators which emit
2.6kg of CO₂ /litre of diesel**

**No access to
the grid**

Cheap initial cost

**Access to repair
services**

**Availability of
spare parts**

Existing solar solutions are poor

Low Quality
Components

Lack of fast, affordable
servicing

Lack of accessible
financing options

Wrongly designed or
incorrectly installed

Village Energy designs, finances, installs and maintains productive use solar systems in Uganda

Target market: off grid schools, health centres & other SMEs.

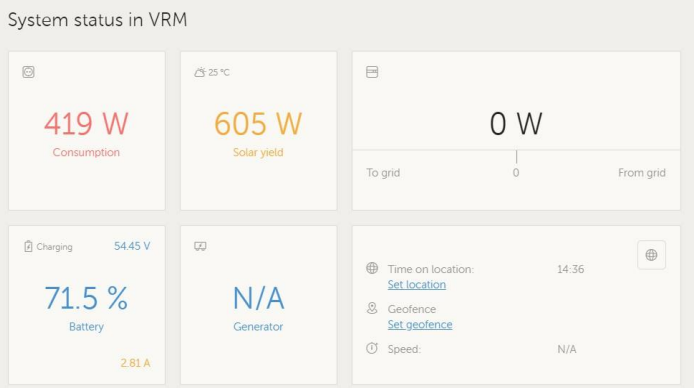

**OUR VISION IS TO REPLACE USAGE OF DIESEL GENERATORS WITH
CLEAN SOLAR ENERGY FOR ALL SMES ACROSS AFRICA.**

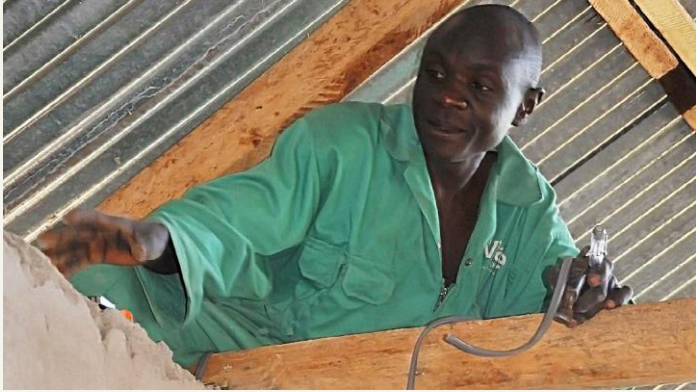

We provide everything under one roof

Customized Solutions

PayGo Customer Financing

Robust Onsite Support

200+ systems installed to date

60

SCHOOLS

52

SMES

23

INSTITUTIONS

6

HEALTH
CENTRES

Our goal is to install over 3000 systems in 7yrs

By 2027, we can impact more than 1 million people, saving over 3mn tonnes of carbon

We are looking for USD 400,000 to scale operations

Amount - USD 400,000

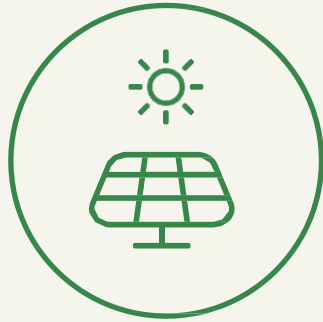

Type - Loan

Interest Rate - Low single digit

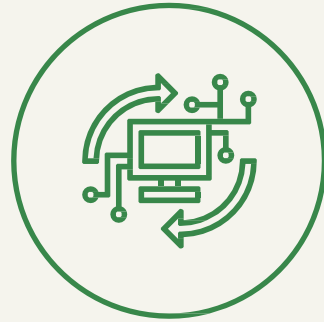

Tenor - 5 to 7 Years

Use of Funds

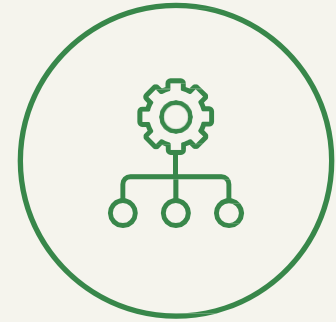

**Importing
Components**

Software Upgrade

**Performance
Management &
Training**

Operations

A young woman with a joyful expression is holding a glowing solar lamp above her head with both hands. She is wearing a vibrant red, yellow, and blue patterned shirt. The background shows a rustic interior with a mud wall, a window, and a bed with a green sheet. The scene is lit by the warm glow of the solar lamp.

**JOIN US TO ENSURE AN AFRICA WHERE EVERY SMALL RURAL BUSINESS IS
POWERED BY CLEAN ENERGY.**

IF WE ACT NOW, WE CAN BUILD A BRIGHT CLEAN FUTURE
